Job Posting #: 1811122

Job Title: Testing Engineer

P2 is a leading wireless mesh technology company offering flexible and expandable network solutions for bandwidth-demanding applications and mission-critical infrastructures. P2 revolutionized the way devices are connected. MeshRanger, our flagship product is ingeniously engineered with our patented MeshInfinity Technology to create "Smart Virtual Fiber" that eliminates the constraints of extensive fiber optic cabling to enable an easy and rapid deployment. P2's flexible mesh architecture provides high bandwidth, low latency and self-healing connection that meets the most demanding connectivity requirements. P2's wireless mesh network is crafted for simple setup and robust transmission almost anywhere.

Job Duties:

- Create and execute Test scenarios and Test cases based upon specification documents
- Document and maintain Test Plans and Test Cases.
- Identify, prioritize, report and track all issues that arise during the project cycle.
- Work closely with developers in the process of testing software prior to its release into production.

Requirements:

- Programming experience in C / Shell Script / Python is an advantage but not required
- Knowledge of technologies like TCP/IP, LAN/WAN routing/switching and other network layer protocols is a plus but not required
- Good written and communication skills in English and Mandarin / Cantonese
- Laser-focused on the smallest details that are meaningful to our customers
- Degree or Higher Diploma in Information Technology, Telecommunication, Computer Science or equivalent. Fresh graduates are welcomed
